Declaration of Independent Inventor

I, Alexandr V. Lukomskiy, make the following declaration:

I am the inventor of the invention disclosed in an application for United States provisional patent entitled:

Diaper Changing Station

I have not assigned, granted, conveyed, or licensed, and I am under no obligation under contract of law to assign, grant, convey, or license any rights in invention to any person who could not likewise be classified as an independent inventor if that person had made the invention, or to any concern which would not qualify as a small business concern having no more than five hundred employees or a nonprofit organization.

And I also acknowledge that once I have assigned, granted, conveyed, or licensed, or come under an obligation to assign, grant, convey or license, any rights to the invention to anyone who could not likewise obtain status as a small entity, I will no longer be entitled to pay fees to the U.S. Patent and Trademark Office in the amounts established for an independent inventor.

I further declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or patent resulting therefrom.

Summary of Invention

This present invention is a piece of furniture with a pad on top, two rods with stirrups and a foot pedal that raises the rods. The purpose of the invention is to provide a changing table, which holds a baby's legs in the proper position, and at the same time, raises the legs and buttocks. This allows the adult to change the diaper without using his/her hands to lift the baby's legs and buttocks. This is convenient because it allows the adult to apply the diaper and easily reach for other needed things while the stirrups hold the legs of the child in place so that the child does not squirm out of position. The object of the invention is to provide a diaper-changing table with a rise-up mechanism and a convenient place that is safe and which simultaneously, holds the baby in proper position for changing.
